

Charvini värvide ostmiseks vali värv välja ja saada tellimus meile (kood, nimetus, kogus) gallery@aapopukk.com

Extra Fine Oil colors on kõrgeima kvaliteediga õlivärv ja seda pakume 208 erinevat tooni.

Super Fine Oil colors valik on 160 värvitooni ja otsitud on parimat hinna ja kvaliteedi suhet.

Superfine oil colors jahvatatakse kaks korda vähem aega värviveskites, mis annab segunemisel paksuse ja läbipaistvuse osas teistmoodi tulemuse kui Extra Fine Oil colors.

Tooni näidis on tehtud järgmiselt: 100% puhas värv/ lisatud 50% lahustit/ lisatud 50% titaan valget.

Info: Pigmenti indeks näitab millistest looduslikest ühenditest või kemikaalidest pigment on tehtud (huvi korral rohkem infot).

Info 2: T = Transparent, läbipaistev; O = Opaque kattev

CHARVIN on Prantsusmaal toodetud profiklassi õlivärv. Tuubid pakendatakse käsitsi ja igale tuubile kinnitatakse värviproov, mis on tehtud täpselt tuubis sisalduva värviga. CHARVIN õlivärvid on kõrge mullasisaldusega, sisaldades puhast pigmenti, mitte täiteaineid. Valge lisamisel saab rohkem värvi, seega ökonoomsem, kui poolprofisarjad, tudengi sarjadest rääkimata. Pigmentid terad on jahvatatud väga väikeseks (samalaadne masin on kasutusel kosmeetikatööstuses). Konsistentsilt paks (õli on lisatud minimaalselt). Väikeste pigmentid terade tõttu ei takerdu värv ning lahjendades pigmentid terad jaotuvad ühtlaselt laiuti, ei jää tükikesse kõrgusesse. Mikroskoopiliselt vaadeldes väikesed terad ei varjuta üksteist. Maksimalne kattevõime. Nende omaduste pärast kasutati sarnase retseptiga toodetud õlivärve kuulsate Flaami meistrite tehnikates, kuhu on lisatud ka erinevaid maalimise õlisid ning lakke. Veelgi enam, tänu oma rikkalikule tekstuurile sobivad need õlivärvid ka pastossemaks maalimiseks ja ennekõike Plein Air maastiku maalijatele. CHARVIN firma pakub kõige laiemat õlivärvide valikut maailmas (üle 200 erineva tooni). Võrdluseks toonide arv teistel värvitootjatel: Winsor & Newton (119), Talens (120), Sennelier (145), Schmincke (100), Lukas (70), Maimeri (82), või Grumbacher (90).

CHARVIN värvide mullasisaldus on kõrgem kui ühelgi teisel värvitootjal. Värvimuldade põhiliseks sideaineks on mooniseemne õli, mis annab värvile suurepärase väljanägemise, kreemja tekstuuri ja mis kõige tähtsam, hoiab ära värvi kollaseks mineku. Samuti lisab see teatud värvidele läbipaistvust, intensiivsust ja lisaks kestab vastupanu valguse ja vananemise suhtes. CHARVIN värvitehase kasutuses on vanad retseptid, mida hoitakse saladuses (aastast 1830), tootmisprotsess võimaldas toota õlivärve sellistele meistritele nagu Cezanne, Bonnard, Ambrogiani jt.

CHARVIN - - Maison de Haute Couleur / Tippvärvide kodu.

Tutustan ja müün CHARVIN õlivärve, õlisid ja lakke.
